Undergraduate students who are enrolled in one of the three other Schools at Penn (the School of Engineering and Applied Science, the College of Arts and Sciences or the School of Nursing) may apply to transfer into, or do a dual degree with, Wharton’s Bachelor of Science in Economics program at the end of the freshman year, in the middle of the sophomore year, or at the end of the sophomore year. Prerequisites for applying for any of these options are as follows:

To apply at the end of the freshman year, the student must have completed:

- Two semesters of calculus: Math 140 or 150 and Math 141 or 151
- Two semesters of economics: Economics 001 and 002

To apply in the middle of the sophomore year, the student must have completed, in addition to the above:

- One semester of statistics: Statistics 101
- One semester of accounting: Accounting 101

To apply at the end of the sophomore year, the student must have completed, in addition to the above:

- The second semester of statistics: Statistics 102
- The second semester of accounting: Accounting 102

Students who are interested in applying for either transfer or dual degree should go to the advising office of their home school in order to fill out the necessary application forms. The home school will then forward the forms to the Wharton School.

PLEASE NOTE:

1. The fact that a student has completed the courses listed above with passing grades does NOT guarantee acceptance into Wharton as either a transfer or a dual degree student. A student must have at least a 3.4 GPA overall in order to be considered. Of those who apply with a 3.4 GPA or better, the most qualified will be accepted, up to the number of spaces available. The number of spaces will vary each semester, depending upon current enrollments.

2. As a rule, students are not accepted as either transfers or dual degrees after the end of the sophomore year. The sole exception is students who are enrolled in a 5-year program in the School of Engineering and Applied Science, who may be accepted as late as the middle of the junior year.

3. The fact that a student has completed part or all of the Wharton degree requirements does NOT guarantee that the student will be accepted either as a dual degree candidate or as a transfer. All students who wish to receive a Wharton degree must be accepted through the process outlined above.

4. If you wish to speak with a Wharton advisor, please come into the advising office in Suite 1100 any time during the year EXCEPT during pre-registration periods. Due to the high demand by current Wharton students for advising services during pre-registration, we are not able to see non-Wharton students during those times.
