

The University of Pennsylvania's Formula SAE Team would like to invite you to the official unveiling of their 2008 car on Tuesday, April 8th, 2008.

We will begin at 12pm in the Levine Hall Lobby. The car will be unveiled at 12:05pm.

The car is student designed, manufactured, and assembled during the academic year and then taken to Detroit for competition against 120 other college teams in May. The team will be judged at the competition on the vehicle's performance in races as well as on design, cost, and marketing reports and presentations.

Team members will be standing by until 4 pm to discuss design, manufacturing, testing, the competition, and answer any questions. There will be pictures of the process as well as some design justification materials. This is Penn's fourth vehicle and undoubtedly our most sophisticated yet.

Design, manufacturing, and assembly of a competitive vehicle have been an arduous yet very rewarding process for us. We are hoping to share with you a student creation which has expanded our engineering capabilities and continues to excite and enthrall us. For the team, this is a very exciting day: it marks the end of the production process and the beginning of testing and final preparation for dynamic and static competition.

We would love for you to join us at 12pm April 8th, 2008 in the Levine Hall Lobby.
