## WORK EXPERIENCE

### University of Pennsylvania

*Research Intern*

*Jan. 2019 – May 2020*

- Worked on a project *Code2Inv* to make it compatible with various input representations including C programs and CHC constraints.
- Conducted a comprehensive study on the state-of-the-art software checkers.
- Implemented an SSA transformation for *Code2Inv* benchmarks using the *Clang C++ API*.

### GetParking

*Summer Intern*

*May 2018 – Jul. 2018*

- Used transfer learning to build a deep learning model based on the InceptionV3 architecture to identify the make and model of a car given its image.
  - Thoroughly reviewed existing state-of-the-art image classification models.
- 

## TEACHING EXPERIENCE

### University of Pennsylvania

*Teaching Assistant*

*May 2020 – Present*

- TA for *CIS 547: Software Analysis* for Summer and Fall 2020 which covers concepts including static and dynamic analyses, symbolic executors and automated debugging.

## ACM Student Chapter, MPSTME

*Instructor*

*Sep. 2019*

- Taught core C concepts to college freshman students over a 4 day workshop.
- 

## PROJECTS

### **Sporq**

An interactive extension to VS Code for exploring code using query-by-example. It provides a flexible, easy-to-use and familiar interface to allow developers to conveniently synthesize custom program analyzers over their code.

### **GenSynth**

*gensynth.cis.upenn.edu*

A genetic algorithm which synthesizes Datalog queries given a set of input and output data without requiring language biases.

### **Code2Inv**

*code2inv.org*

A general end-to-end deep reinforcement learning framework which learns a valid loop invariant for any given verification task in a manner similar to how a human expert would learn the invariant.
